

Storage

FOR HEALTHCARE-TOY STORAGE

CHILDREN'S HOSPITAL USES MOBILE STORAGE TO MEET THEIR TOY STORAGE CONCERNS IN RECREATIONAL THERAPY AND EDUCATION AREA

- WHAT:** Children's Hospital and Medical Center, Seattle Washington.
- PROBLEM:** The Recreational Therapy and Educational Departments needed room for the storage of both toys and games in a centrally located area and needed to take them out of the basement.
- OBJECTIVE:** To remove the toys and games from the basement, and allow easy access from the playroom, classroom, and offices, and still not lose valuable space.
- SOLUTION:** Recreational Therapy and Education visited other departments throughout the hospital, and viewed the ease and reliability of the Spacesaver product. By implementing this same technology in the recreational area, the storage space was increased by over 200%.
- PRODUCT:** Spacesaver Manual Mobile Storage System.

UNIQUE FEATURES

- Flexible shelving adjustments without the requirement of tools.
- Shelves designed to assist interface and assure adequate storage with no wasted space.
- Smooth movement allowing safe storage with no jarring

BENEFITS

- More than doubled the storage space in the Recreational Therapy and Educational area.
- Removed toys from the basement for easy access.
- Increased efficiency since items can be stored and on hand with no wasted space.
- Easy in and out access to supplies with good visibility of stock.
- Supplies are centrally located close to where they are needed.
- Room for future growth.
- Flexibility which allows all types and sizes of toys to be stored.

"The Spacesaver system is very versatile and has easily adapted to our needs. We really rely heavily on donations, and we get toys of all different shapes, size's, and weights. It always was frustrating with our old static shelves, because a lot of toys wouldn't fit and we had to find somewhere else to put them. With our mobile system, that isn't a problem any more."
